Taylor Swift gained another great honor this year the first-ever Taylor Swift Award—at the 64th yearly BMI Pop Awards.

Held at the Beverly Wilshire Hotel in Beverly Hills, California, the ceremony honored the writers and publishers of the most-performed pop songs during the past year. The Taylor Swift Award was a recognition (认可) of both Swift's musical influence and creative gift.

In her acceptance speech, Swift said that she was happy to get the award named after her. "It is really a relief that BMI decided to give me the Taylor Swift Award, because if they had chosen somebody else to give it to, I'd be kind of angry about it," the singer joked.

This eponymous (同名的)award marked only the second time in BMPs history that the organization has presented an award in an artist's name. Michael Jackson, a legendary (传奇的)artist, was the first to get that honor in 1990.

"Taylor Swift is one of the most popular singers in US. She has shown pop culture through her songs," said Barbara Cane, BMI's Vice President of Writer/ Publisher Relations. "She has had a deep influence, not only musically, but also through her personal belief and commitment to create a standard that values and respects music for everyone. We felt it suitable to award Taylor an honor that is as special as she is."

Taylor also claimed four of the year's most-performed songs to earn the honor of Pop Songwriter of the Year.

12. Sharks have gained unfair reputation for being large fierce sea animals. Human being's unfounded fear and hatred of these ancient creatures are leading to a worldwide slaughter （大屠杀）, which may result in the extinction （绝种）of many larger, coastal shark species. The shark is the victim of a warped （有偏见的） attitude of wildlife protection; we fight only to protect the beautiful, nonthreatening parts of our environment. And, in our efforts to bring back only nonthreat parts of our earth, we ignore other important parts. A perfect illustration of this attitude is the contrasting attitude towards another large sea animal, the dolphin. During the 1980s, environmentalists in the Linked States objected to the practice of hunting tuna （金枪鱼） in the Pacific Ocean since these nets also caught dolphins. The environmentalists place enough political and economic pressure to prevent tuna companies from buying tuna that had been caught in drift nets. In contrast to this effort, the populations of sharks in the Pacific Ocean have decreased to the point of extinction and there has been very little effort by the same environmentalism to save this important species of wildlife in water. Sharks are among the oldest creatures on earth, having survived in the seas for more than 350 million years. They are feeding on wounded or dying animals, thus performing an important role in nature of knocking out the weaker animals in a species. Just the fact that species such as the Great White Shark have managed to live in the oceans for so many millions of years is enough proof of their efficiency and adaptability to changing environment. It is time for humans, who may not survive another 1, 000 years at the rate they are damaging the planet, to cast away their fears and begin considering the protection of sharks as creatures that may provide us with an understanding of our own survival.

1. How did the environmentalists manage to protect dolphins? ___

A. They prevented the fishermen from selling them at markets.

B. They only permitted the fishermen to catch them using nets.

C. They created some shelters where dolphins could be protected.

D. They used political and economic means to achieve their aim.

B. what are the oldest creatures

13. Liverpool, my hometown, is a special city. It is so unique that in 2004 it became a World Heritage（遗产）Site.

I recently returned to my home city and my fist stop was at a museum on the River Mersey. Blanketed in mist （薄雾）, Victorian architecture rose from the banks of the river, responded to the sounds of sea-birds, and appeared unbelievably charming. When I headed toward the centre, I found myself surrounded by buildings that mirror the best palaces of Europe. It is not hard to imagine why, on first seeing the city, most visitors would be overpowered by the beauty of the noble buildings, which are solid signs of Liverpool's history.

As if to stress its cultural role, Liverpool has more museums and galleries than most cities in Britain. At Walker Art Gallery, I was told that it has the best collections of Victorian paintings in the world, and is the home of modern art in, the north of England. However, culture is more than galleries. Liverpool offers many music events. As Britain's No. 1music city, it has the biggest city music festival in Europe, and its musicians are famous all over the world. Liverpool is also well-known for its football and other sports events. Every year, the Mersey River Festival attracts thousands of visitors, making the city a place of wonder.

As you would expect from such a city, there are restaurants serving food from around the world. When my trip was about to complete, I chose to rest my legs in Liverpool's famous philharmonic pub（酒馆）. It is a monument to perfection, and a heritage attraction itself.

Being a World Heritage Site, my home city is certainly a place of "outstanding universal value". It is a treasure house with plenty of secrets for the world to explore.

It was a warm and sunny morning at the Central Park Zoo. Abigail and her classmates were buzzing with excitement as their school bus entered the zoo parking lot. Today, Abigail's class was going on a field trip to the zoo to learn more about the animals and their natural habitats.

"Before you leave the bus, please make sure you have a buddy!" Mrs. Brown announced. To make sure no one got lost in the zoo, each student had a buddy. Abigail's buddy was Derrick. Derrick loved animals and was also excited to go to the zoo. But sometimes, Derrick did not follow the rules and got into trouble. Abigail hoped that today, Derrick would follow the rules so that they would not get into trouble.

While the rest of the students got off the bus, Abigail and Derrick quickly ran off the bus to explore. They found many different kinds of animals and learned a lot about their natural habitats. They saw elephants playing and giraffes eating. They saw polar bears sleeping and monkeys leaping. Abigail asked Derrick.

"Derrick, what is your favorite animal?"

"I think I like chimpanzees best. They have a lot of energy, just like me! What animals do you like, Abigail?"

"I love polar bears! I think their lifestyle in the Arctic is very interesting."

A few hours later, Abigail and Derrick started to feel hungry. They made their way back to the zoo entrance to eat lunch at the Rainforest Cafe. The Rainforest Cafe is both Abigail and Derrick's favorite restaurant because there is an aquarium inside. The restaurant is also famous for its chocolate cake, which Abigail ordered for dessert after they had finished their lunch.

As Abigail was finishing her cake, Derrick excused himself to go to the restroom. About ten minutes later, a sudden alarm began to go off.

"Attention! Someone has opened the chimpanzee cage! Some chimpanzees have escaped!"

People were screaming and started to run. Abigail looked for Derrick, but he was nowhere to be found.
